**IFIB-ACT-SACT-18-38 CONTRACTOR SUPPORT
FOR ROUTINE AND EMERGENT GROUND
MAINTENANCE**

Reference:

Q&A #3

Date of Issue:

3 Oct 2018

The following questions were raised with respect to subject IFIB. Responses are to provide clarification.

Question	Response
Items for snow removal (Items 12, 13, 14). To provide an estimated price for snow removal based on estimated quantities and estimated # of events is to be included in total bid pricing. There is no pricing model for indefinite quantity items, ie additional snow removal. How will that affect the total bid price schedule?	Pricing on up to (3) snow removals should be based off of 4 inches of accumulation. Additional removals (2) of the same accumulation will have a separate line item and will be designated as will call.
Does the requirement allow for rock salt for ice melt?	There is no specification on type either will be sufficient.
Can you provide a complete landscape view (map) of the complex which includes the latest landscaping boundaries?	The only view we have of the complex and boundaries is included in the IFIB on page 21
