

NATO Allied Command Transformation

Trident Juncture 2018 (TRJE18)

Fact Sheet – Deployable Messing Facility

TRJE18 Mission:	TRJE18 provides an environment for existing or new capabilities to be tested, refined, and further developed. By coordinating and integrating experiments from NATO entities and Nations into TRJE18, we seek to allow the best experimental results without placing exercise objectives at risk. Allied Command Transformation Operational Experimentation has assigned a TRJE18 Venue Coordinator since the number of TRJE18 experiments now exceeds 20 activities, ranging from discovery to validation.
Experiment Description:	<p>Deployable Mess represents one of the many stands of Smart Defence Project 1.16 Deployable Air Activation Modules Project, designed to advance NATO capacity to perform agile and effective deployed Air Operations. Italian Air Force Deployable Mess, already nationally-tested in Real Life Support to both Exercise and national Deployed Operations, is now ready to be trialled in a Multinational environment.</p> <p>The aim of this experiment is to demonstrate the feasibility of employing a specialised team of logisticians for the set up and operation of a Deployable Mess, able to deploy a full catering service in support of up to 400 personnel and part of the Base Module, composed by more than one nation within the framework of the NATO Deployed Air Base.</p>
The TRJE18 Opportunity:	TRJE18 offers a platform to envisage the deployment of deployable messing facilities for the air assets from different nations' air assets allowing testing of the messing facilities in a realistic environment.
Categories:	Live Exercise
Milestone:	Apr 2018 – Site Survey in Norway Sep 2018 - Assets departing for Boedo, Norway 25 Oct – 7 Nov 2018 – Live Exercise Execution Post TRJE18 Experiment - Collect requirements to help deliver on Smart Defence Initiative 1.16
Project Leads:	Italian General Staff, LTC Massimo Cicerone, Massimo.cicerone@aeronautica.difesa.it Italian General Staff, LTC Angelo Montinaro, angelo.montinaro@aeronautica.difesa.it
