

# NATO Allied Command Transformation

## Trident Juncture 2018 (TRJE18)

### Fact Sheet – Land Command and Control System

**TRJE18 Mission:** TRJE18 provides an environment for existing or new capabilities to be tested, refined, and further developed. By coordinating and integrating experiments from NATO entities and Nations into TRJE18, we seek to allow the best experimental results without placing exercise objectives at risk. Allied Command Transformation Operational Experimentation has assigned a TRJE18 Venue Coordinator since the number of TRJE18 experiments now exceeds 20 activities, ranging from discovery to validation.

**Experiment Description:** The current version of NATO's Land Command and Control System is about to reach its end of life in 2021. To avoid a capability gap, a new Land Command and Control capability needs to be in place. Observing the use of Land Command and Control System will run in parallel to the exercise to gain perspective from the operators of their impressions of Land Command and Control System.

The aim of this experiment is to capture lessons to refine the high-level requirements for the future Land Command and Control capability development.

**The TRJE18 Opportunity:** To exercise command and control in the full spectrum of operations, an operational and usable command and control functional service is required for both NATO Command Structure and NATO Force Structure. TRJE18 will offer a platform to analyse and assess the operational employment of Land Command and Control System in a High Visibility Exercise.

**Categories:** Live Exercise

**Milestone:** Jun 2018 – Coalition Warrior Interoperability Exercise (CWIX)  
Jul 2018 - TRJE18 Final Coordination Conference (FCC)  
25 Oct – 7 Nov 2018 – Live Exercise Execution  
Post TRJE18 Experiment - Refine requirements for future Land C2 capability development
