

# NATO Allied Command Transformation

## Trident Juncture 2018 (TRJE18)

### Fact Sheet – Medical Modular Approach

- TRJE18 Mission:** TRJE18 provides an environment for existing or new capabilities to be tested, refined, and further developed. By coordinating and integrating experiments from NATO entities and Nations into TRJE18, we seek to allow the best experimental results without placing exercise objectives at risk. Allied Command Transformation Operational Experimentation has assigned a TRJE18 Venue Coordinator since the number of TRJE18 experiments now exceeds 20 activities, ranging from discovery to validation.
- Experiment Description:** Medical Modular Approach Interoperability Experimentation is a discovery process conducted over two years (2017-2018). It employs observation and query to identify enhancers or inhibitors to interoperability between medical modules employed in computer assisted exercises and command post exercises.
- The aim of this experiment is to assess effectiveness of Command and Control for medical modularity to provide insights on issues affecting effective and efficient modular interoperability and inform development of a concept for employment for medical modular approaches.
- The TRJE18 Opportunity:** TRJE18 offers a platform to practice close cooperation, coordination, interaction and liaison between medical modules from participating nations through the creation of medical incident and casualty play.
- Categories:** Computer Assisted Exercise/Command Post Exercise
- Milestone:**
- May 2018 – Site survey
  - Jun 2018 – Decision on participating in Live Event
  - Jun/Jul 2018 – Main Event List/Main Incident List Scripting + Start of Exercise Validation
  - Jul 2018 - TRJE18 Final Coordination Conference
  - 14 – 23 Nov 2018 – Computer Assisted Exercise/Command Post Exercise Execution
  - Post TRJE18 Experiment - Data, information and analysis to refine Concept Development
