

NATO Allied Command Transformation

Trident Juncture 2018 (TRJE18)

Fact Sheet – Weapons of Mass Destruction Disablement

TRJE18 Mission:	TRJE18 provides an environment for existing or new capabilities to be tested, refined, and further developed. By coordinating and integrating experiments from NATO entities and Nations into TRJE18, we seek to allow the best experimental results without placing exercise objectives at risk. Allied Command Transformation Operational Experimentation has assigned a TRJE18 Venue Coordinator since the number of TRJE18 experiments now exceeds 20 activities, ranging from discovery to validation.
Experiment Description:	<p>The Weapons of Mass Destruction Disablement experiment intends to progressively develop and improve the Weapons of Mass Destruction Disablement elements of the training environment that the Joint Warfare Centre provides to its training audiences. With the Weapons of Mass Destruction Disablement Concept acting as a basis, the experiment will utilise the realistic operational environment generated in the Joint Warfare Centre directed training events to further understand Weapons of Mass Destruction Disablement processes to support the future development of a concept of operations and disablement doctrine.</p> <p>The aim of this experiment is to assess the completeness of the Weapons of Mass Destruction Disablement Concept, Command and Control Structure, force requirements and employment mechanisms for Weapons of Mass Destruction Disablement Operations.</p>
The TRJE18 Opportunity:	TRJE18 offers a platform for the Chemical, Biological, Radiological, and Nuclear community to be added into other Joint Warfare Centre exercises to ensure that the proper emphasis is given to Weapons of Mass Destruction related training.
